Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, "reduced reactive-power" is undefined and therefore renders the claim indefinite. In claim 3, "(overdrive wheel train)" is informal and confusing. If applicant intends to claim this feature, he must recite it positively. In claim 4, "(overdrive)" is likewise informal and therefore confusing. In claim 6, "is led" is confusing. How can an input "lead"? In claim 10, "the axial direction" lacks an antecedent.

Allowable Subject Matter

Claims 1-24 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter: The prior art does not anticipate nor render obvious the invention of a variable speed transmission that includes the combination of two parallel branches, one branch including a multi-step transmission and the other branch including a summing transmission, and wherein a friction clutch is provided, the clutch having a first and a second element, one of the elements being connectable to transmission elements by means of at least one shift element.

Conclusion

The examiner has considered the references cited in applicant's Information Disclosure Statement filed August 20, 2003. None of the references cited show a parallel branch transmission with an interposed friction clutch.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Frost '358 shows a parallel transmission including a multi-speed branch and a summing branch, but does not appear to show the required clutch. Bosko '167 shows a variable speed transmission with a clutch 68 but the transmission does not appear to be of the parallel type.
